BTE ATTACHMENT

PANEL LIFTER

Move and install full rail panels with minimal boots on the ground.

The **BTE Panel Lifter** securely handles full rail panels up to 40 feet in length, streamlining large-scale rail projects while reducing manual labor. Four hydraulically controlled clamps provide a firm grip, ensuring stability during handling, while a compact and lightweight frame boosts the excavator's lift capacity, enhancing performance without compromising safety.

AT-A-GLANCE

Height/Length	38" x 27" (966 mm x 686 mm)
Width	17.50" (445 mm)
Weight	600 lbs (273 kg)
Auxiliary Hydraulic Circuit Reqs.	Med. Pres. Circuit
Squeeze Cylinder Reqs.	10 Max GPM/3,000 Max PSI (37 l/m/20,684 kPa)

FEATURES

- Handles wood tie panels up to 40 feet in length
- Four hydraulically controlled clamps ensure secure grip
- Improved visibility allows operators to verify positive clamping before lifting
- Clamps require confirmation to disengage, eliminating inadvertent release
- Compact, lightweight frame for additional lift capacity
- Compatible with the BTE-330 and the BTE-325/326
