BTE ATTACHMENT

UNIVERSAL TIE HEAD

Position ties with speed and precision across track maintenance and construction

The **BTE Universal Tie Head,** designed to operate on virtually any machine equipped with a hydraulic circuit, brings speed, precision, and versatility to tie manipulation. A built-in rotator keeps positioning flexible, and the integrated diverter and priority valve let a single hydraulic circuit power the attachment. Foot pedal controls simplify installation and operation, and BTI carbide replaceable gripper pads ensure a long, dependable service life.

AT-A-GLANCE

Height	42 in
Weight	1,100 lbs
Hydraulic Circuits Required	1 Bi-directional Circuit
Hydraulic Pressure Required	Up to 3,000 PSI
Case Drain	Required

FEATURES

- Built-in rotator increases machine compatibility
- Diverter enables operation using a single hydraulic circuit
- Foot-pedal operated diverter eliminates the need for machine control modifications
- BTI carbide replaceable gripper pads provide extended wear life
